APPLICATION GUIDE

DEGREASER HD 950

APPLICATION INSTRUCTIONS

Description

Degreaser HD 950 is a safe and effective solution for removal of oil, grease, food and general dirt and grime from a wide range of hard surfaces like driveways, paths, patios and floors. It is ideal for preparing concrete surfaces before application of a sealer or paint. While most degreasers rely on strong acids or caustics which can damage the surface Degreaser HD 950 contains powerful 'green' surfactants which are readily biodegradable and safe to use.

Preparation

The use of gloves and protective goggles is recommended during use. Wet area before use but avoid water pooling.

Application

Dilute 1 part Degreaser HD 950 with 10 parts water and pour solution over area. While still wet work solution into surface with stiff bristle brush in a circular motion. While still wet wash or hose down area. A pressure washer may be used to remove residues but use a shallow angle (ie point sprayer out in front not down) to avoid pushing oils and stains into porous surfaces like concrete. For heavy staining and oil patches, apply Degreaser HD 950 neat and scrub vigorously with a stiff brush until a thick foam develops. Rinse with a small amount of hot water and scrub area again, before hosing area clean.
